Response sources

Hastily made by @annevk

Possible fetch (request) sources

- Navigation -> fetch
  - Address bar
  - <iframe>
  - ...
- Fetch
  - JavaScript fetch()
  - HTML <img>
  - CSS background-image: url(...);
  - ...

Potential response source I

- HTML's "list of available images"
  - Only applicable to image fetches
  - Enables synchronous(!) switching of images

Potential response source II

- The "preload cache"
  - Not actually defined: https://github.com/w3c/preload/issues/97

Potential response source III

- The service worker
  - Has access to storage APIs (e.g., Cache, Indexed DB)
  - Can generate responses with script
  - 🎉

Potential response source IV

- HTTP cache
  - I suspect y'all are familiar

Potential response source V

- HTTP/2 server push cache

Potential response source VI

- The network!

Apologies for any errors

- A lot of this is defined by
  https://fetch.spec.whatwg.org/ and discussed over at
  https://github.com/whatwg/fetch (y'all are most welcome
  to join)
